Source: Original October 2002 (based on best available data)

^a New Construction right-of-way (ROW) – 125 feet wide

^b Structures – Self-supporting, lattice steel assumption (maximum disturbance per structure: temporary 0.23 acres [100 feet by 100 feet]. Long-term 0.1 acres [66 feet by 66 feet] (Slightly less long-term disturbance for single-pole steel). Assumption: For reconductoring, number of proposed structures assumes 25% of the existing structures proposed for replacement (Segment E has 2 sets of single-circuit lines in certain locations)

^c Access Roads – 15 feet wide. Assumption: Segments A, B, C, D, E, F, and H contain existing access roads.

^d Pulling Sites – 0.4 acre (125 feet by 125 feet) per site

^e Material Storage Yards – 5.0 acres (400 feet by 540 feet) per yard

^f Realignments would include 2.8 miles of Segment A₁ and all 5 miles of Segment G.

^g Proposed Action includes Segments A₁, B, C, D, E, F, G, and H

^h Alternative 1 includes Segments A, B, C, D, and E

ⁱ Alternative 2 includes Segments A₁, B, F, G, H

^j Alternative 3 includes Segment E₁
